THE BARCODE EXPERTS

Axicon linear verifier app for Android

The Axicon linear barcode verifier app works with all 6000, 6500 and 7000 series verifiers that have USB connectivity. All you need is a short adapter cable that will allow the verifier's USB cable to plug into the tablet's micro-USB or USB-C port, the one you use for charging.

Features & Benefits

If you have any of the Axicon linear verifiers, you can use them with this app on an Android tablet or phone to verify your barcodes. The tablet/phone connection is sufficient to power the verifier head, and you can see the grade results immediately. For full details you can transfer the Axicon .scn files to your computer.

Note: not all Android devices support USB On-The-Go, which is required for connecting to a verifier. If your device does not support this feature, a warning message will appear when starting the app. You will still be able to load and view existing scn files.

About Axicon

Axicon Auto ID is a world leader in barcode verification, having developed and manufactured our own range of verifiers since 1989. Axicon barcode verifiers are used to measure the quality of linear and matrix barcodes, on all levels of product packaging.
